

THE VIBRANT COLORS OF BUTCHART GARDENS AND HISTORIC VICTORIA WITH CHARLES NEEDLE AND MARK S. JOHNSON

Join two of the most enthusiastic, passionate and knowledgeable instructors you'll ever encounter for an unforgettable week of arresting beauty in North America's most dazzling botanical wonder, Butchart Gardens. As one of the world's premier floral show gardens, Butchart features 55 acres of awe-inspiring splendor—including a classical Italian Garden, a Japanese Garden, a Rose Garden, and the dramatic Sunken Garden.

Nestled on pristine Brentwood Bay, only minutes from the entrance to Butchart, is Brentwood Bay Lodge & Spa—your home for the week. This luxurious, five-star oceanfront resort sets the stage for a week of inspiring photography and unbridled creativity. Our group will also have the opportunity to explore the photographic richness and diversity of Vancouver Island's most charming and historic city, Victoria.

With a combined 24 years of teaching experience, Charles and Mark will guide you with exuberant, personalized attention both in the field and classroom. They will share extraordinary creative image-making techniques that will inspire you to develop your own vision, expand your photographic horizons, and create images previously unimaginable.

In addition to field instruction, you will experience post-capture classroom lectures, energizing assignments, and supportive image evaluations. Field instruction emphasizes creative macro, impressionistic flower, multiple-exposure, high dynamic range, and artistic architectural photography. Classroom instruction features a variety of montaging techniques developed by Mark, as well as an exploration of methods for creating photos with jaw-dropping impact. This is a digital capture and darkroom workshop that permits students to capture images in early-morning and late-afternoon/evening light and begin experimenting with them in the classroom shortly thereafter.

Dates:

July 25 – 30, 2010 (7 pm Sunday through noon Friday)
